

Raw reference state	Dense: included	Dense: omitted	Hybrid: included	Hybrid: omitted
Persistent inclusion	20.72	0.23	29.27	0.21
Crossing	7.57	12.01	6.77	6.93
Persistent omission	0.43	59.04	0.42	56.40

WANDS / MiniLM, ascending canonicalization, K = 20. Each value is a query-macro % of all highest-label support.

Each six-cell block sums to 100% before rounding. Dense and hybrid have separate raw reference families.
